## Project Documents

- Change log
  - Status of all change requests
- Lessons learned register
  - Used to improve the performance of the project
  - Used to avoid repeating mistakes
  - Helps to identify where to set rules or guidelines
- Milestone list
  - Show schedule dates for specific milestones
- Project communications
  - Performance reports, deliverable status, and other information
- Project schedule

### Project Documents (cont'd)

- Requirements traceability matrix
  - Links product requirements to the deliverables satisfied
- Risk register
  - Provides information on threats and opportunities that may impact project execution
- Risk report
  - Sources of overall project risk
  - Summary information on identified individual project risks

### Approved change requests

- An output of the perform integrated change control process
- Includes requests reviewed and approved for implementation by the project manager or the change control board
- Approved change requests may be:
  - A corrective action
  - A preventative action
  - Or a defect repair
- Approved change requests are scheduled and implemented by the project team
- Can impact in the area of the project or the project plan
- Can also modify the formally controlled project management plan components or documents

## Organizational Process Assets

- Organizational standard policies, processes, and procedures
- Issue and defect management procedures
- Issuing defect management databases containing historical issue and defect status
- Performance measurement database
- Change control and risk procedures
- Project information from previous projects

## Project Management Information System (PMIS)

Provides access to information technology software tools:

- Scheduling software tools
- Work authorization systems
- Configuration management systems
- Information collection and distribution systems
- Interfaces to other online automated systems
- Automated gathering and reporting on key performance indicators (KPI) can be part of the system

## Meetings

- Discuss and address pertinent topics of the project
- Directing and managing project attendees may include:
  - Project manager
  - Project team
  - Appropriate stakeholders
- Types of meetings include, but are not limited to:
  - Kickoff,
  - Technical,
  - Sprint or
  - Iteration planning,
  - Etc.

## Deliverables

A deliverable is in any unique and verifiable product, result, or capability to perform a service that is required to be produced to complete a process, phase, or project.

Change control should be applied towards the first version of a deliverable has been completed

- Versioning
- Supported by configuration management tools and procedures

---

## Work Performance Data

- Raw observations and measurements identified during activities being performed
- Data are often viewed as lowest level of detail from which information is derived by other processes
- Data gathered through work execution and pass to the controlling processes for further analysis
- Examples
  - Work completed
  - Key performance indicators
  - Technical performance measures

## Issue Log

- Issue type
- Who raised the issue when
- Description
- Priority
- Who is assigned to the issue
- Target resolution date
- Status
- Final solution

## Change Requests

The change request is a formal proposal to modify any document, deliverable, or baseline.

Change requests may include:

- Corrective action
- Preventative action
- Defect repair
- Updates

## Work Performance Requests

Performance information is:

- > Combined
- > Recorded
- > Distributed

Purpose

- > Awareness
- > Generate decisions or actions

Circulated through project defined communication processes

## Work Performance Reports

Work reports of particular interest:

- Resource availability
- Schedule and cost data
- Earned value reports
- Burn up or burn down charts

© 2019 FM College, Inc. All Rights Reserved

---

---

---

---

---

## Change Requests

Change requests that have an impact on the project baselines should include information:

- The cost of implementing the change
- Modifications schedule dates
- Resource requirements
- Risks

Only approved changes should be incorporated into a revised baseline

### Expert Judgment

Individuals specialized knowledge of or training in

- Technical knowledge of the industry and focus area of the project
- Legislation and regulations
- Legal and procurement
- Configuration management
- Risk management

## Change Control Tools

Tools should support the following configuration management activities:

- identify configuration item
- record and report configuration items status
- perform configuration item verification and audit

Tools should support the following change management activities as well:

- identify changes
- document changes
- decide on changes
- track changes

## Meetings

### Change control board

- Reviewing
- Approving
- Rejecting
- Deferring

Assessing the impact of changes is an essential part

Alternatives to the requested changes may also be discussed and proposed

## Approved Change Requests

Implemented through the Direct & Manage project work process

- Deferred or rejected change requests are communicated to the person requesting the change
- The disposition of all change requests are recorded in the change log as a project document update

---

---

---

---

### Project Management Plan Updates

- Any formally controlled component of the project management plan may be changed as a result of this process
- Changes to baselines are only made from the last baseline forward
- Past performance is not changed

© 2019 FM College, Inc. All Rights Reserved

---

---

---

---

---

### Project Documents Updates

- Any formally controlled project document may be changed as result of this process
- A project document that is normally updated as a result of this process is the change log
